

# Australian Direct Entry Payments and Dishonour report

NAB Direct Link File format specifications May 2024

# **Table of Contents**

| 1. | Overview   | 2  |
|----|--|----|
| 2. | File Specifications  | 3  |
|    | 2.1 Record Descriptions  | 4  |
|    | 2.1.1 Record Type '1' – Detailed Records                       | 5  |
|    | 2.1.2 Record Type '7' – File Total Record                      | 7  |
|    | 2.1.3 Coded Character Set                                      | 8  |
|    | 2.1.4 Transaction Codes  | 8  |
|    | 2.2 File Examples  | 9  |
|    | 2.2.1 Standard Direct Entry File                               | 9  |
|    | 2.2.2 Self-Balanced Direct Credit File                         | 10 |
|    | 2.2.3 Self-Balanced Direct Debit                               | 10 |
|    | 2.2.4 Unbalanced Direct Credit                                 | 10 |
|    | 2.2.5 Unbalanced Direct Debit                                  | 10 |
|    | 2.2.6 Mixed Direct Entry                                       | 10 |
| 3. | Validations  | 11 |
|    | 3.1 General Validation Controls                                | 11 |
| 4. | Acknowledgement Files  | 12 |
|    | 4.1 Format   | 13 |
|    | 4.2 Acknowledgement Status                                     | 13 |
|    | 4.3 Examples of common messages                                | 14 |
|    | 4.4 Acknowledgement Examples                                   | 15 |
| 5. | Disbursement Reports   | 19 |
|    | 5.1 File Layout  | 19 |
| 6. | Direct Entry Returns Report (Dishonour)                        | 23 |
|    | 6.1 DE Returns Report format                                   | 24 |
|    | 6.1.1 File Structure   | 24 |
|    | 6.1.2 File Layout: Record Type 0 – Descriptive Record (Header) | 24 |
|    | 6.1.3 File Layout: Record Type 2 – Detail Record               | 25 |
|    | 6.1.4 File Layout: Record Type 7 – File Total Record (Trailer) | 26 |
|    | 6.2 Examples   | 27 |
|    | 6.2.1 Example: Direct Entry Returns Report (by DE ID)          | 27 |
|    | 6.2.2 Example: Direct Entry Returns Report (by Trace Account)  | 27 |

# 1. Overview

- Domestic Australian account payments are processed using the Australian Banking Association (ABA) file format and used by all major Australian financial institutions to specify payments to be made from one bank account to one or more bank accounts
- Bulk payments can be credit or debit payments
- A common use case for Direct Entry is for processing payroll as these are bulk payments sent to multiple payee accounts
- Credit payments are approved and processed based on available funds held (utilising NAB Connect)
- All files must have a Direct entry user ID (DE User ID) to comply with the file format. Each NAB Direct Link facility must have their own DE User ID
- Direct Entry payments can be configured via two different payment flows.
  - 1. Straight Through Processing (STP)
  - 2. Authorisation via NAB Connect
- There are generally three types of issues preventing payments from processing successfully:
  - 1. Payment formatting errors
  - 2. Insufficient clearing funds or approved limits
  - 3. General account closures or debit blocks
- Payment files can be future dated up to 90 days in advance
- Payment files with a value date of up to 7 days in the past can be submitted for processing
- The Lodgement reference in a direct entry file is what appears in a beneficiary / payees account statement. It is recommended that the information included in the lodgement reference be a unique payment identifier.

# 2. File Specifications

- The file format is a fixed record length ASCII (American Standard Code for Information Interchange)
- · Record length is 120 characters (bytes) long and separated from the next record by a carriage return/line feed (CR/LF)
- Strings of characters within the line represent specific pieces of information. For example, in a Detail Record line the characters at positions 21-30 represent the amount to be paid to or received from your customer.
- Each file contains 3 main blocks of records
  - Descriptive Record (Type 0) one only per User ID
  - Detail Records (Type 1) one or more
  - File Total Record (Type 7) one only per User ID
- Each file can only contain 1 block of each record type

# 2.1 Record Descriptions

#### Record Type '0' - Descriptive Record

The first record in the file is the Descriptive Record

| Character Position | Field Size | Field Description                     | User Specification   |
|--------------------|------------|---------------------------------------|--|
| 1                  | 1          | Record Type 0                         | Must be '0'  |
| 2-18               | 17         | Blank.                                | Must be left blank   |
| 19-20              | 2          | Reel Sequence Number                  | Must be numeric commencing at 01   |
|                    |            |                                       | Right justified  |
|                    |            |                                       | Zero filled  |
| 21-23              | 3          | Name of User Financial<br>Institution | Must be an approved financial institution abbreviation. (Refer to AusPayNet website)               |
| 24-30              | 7          | Blank.                                | Must be left blank   |
| 31-56              | 26         | Name of User supplying file.          | Left justified   |
|                    |            |                                       | Must be left blank   |
|                    |            |                                       | BECS EBCDIC character set valid  |
|                    |            |                                       | Must not be all blank  |
|                    |            |                                       | Should be User preferred name  |
| 57-62              | 6          | Number of User supplying file.        | Must be User Identification Number, which is assigned by AusPayNet and User Financial Institutions |
|                    |            |                                       | Must be numeric  |
|                    |            |                                       | Right justified  |
|                    |            |                                       | Zero filled  |
| 63-74              | 12         | Description of entries on file        | BECS EBCDIC character set valid  |
|                    |            | (for example "Payroll")               | Should accurately describe contents of file  |
|                    |            |                                       | Left justified   |
|                    |            |                                       | Can be left if needed  |
| 75-80              | 6          | Date to be processed (i.e. the        | Must be numeric and in the format of DDMMYY  |
|                    | date tran  | date transactions are released        | Must be a valid date   |
|                    |            | to all financial institutions).       | Zero filled  |
| 81-120             | 40         | Blank.                                | Must be left blank   |

### 2.1.1 Record Type '1' - Detailed Records

| Character Position | Field Size | Field Description               | User Specification  |
|--------------------|------------|---------------------------------|---|
| 1                  | 1          | Record Type 1                   | Must be '1'   |
| 2-8                | 7          | BSB Number in format xxx-xxx    | Must be numeric with a hyphen in character position 5   |
|                    |            |                                 | Character positions 2 to 4 must be a valid 2 or 3 digit institution identifier issued by APCA   |
|                    |            |                                 | (refer to AusPayNet website)  |
| 9-17               | 9          | Account number to be            | Alpha-Numeric (26 letters of the alphabet)  |
|                    |            | credited/debited                | Hyphens & blanks only are valid   |
|                    |            |                                 | Must not contain all blanks or all zeros  |
|                    |            |                                 | Leading zeros, which are part of an account number, must be shown   |
|                    |            |                                 | Edit out hyphens where account number exceeds nine characters   |
|                    |            |                                 | Right justified   |
|                    |            |                                 | Leave blank   |
| 18                 | 1          | Indicator                       | Must be a space   |
|                    |            |                                 | or  |
|                    |            |                                 | the letter 'N', 'T','W','X' or 'Y'  |
|                    |            |                                 | • 'N' – for new or varied BSB number or name details  |
|                    |            |                                 | 'T' – for a drawing under a Transaction Negotiation   |
|                    |            |                                 | Authority Withholding Tax Indicators:   |
|                    |            |                                 | 'W' – dividend paid to a resident of a country where a double tax agreement is in force   |
|                    |            |                                 | 'X' – dividend paid to a resident of any other country  |
|                    |            |                                 | <ul> <li>'Y' – interest paid to all non-residents. Where applicable,<br/>the amount of withholding tax is to appear in character<br/>positions 113-120</li> </ul> |
| 19-20              | 2          | Transaction Code                | Must only be valid industry standard transaction codes, numeric only  |
|                    |            |                                 | Please refer to <u>transaction codes</u> for a full list  |
| 21-30              | 10         | Amount                          | Numeric only  |
|                    |            |                                 | Must be greater than zero   |
|                    |            |                                 | Show in cents without punctuations  |
|                    |            |                                 | Right justified   |
|                    |            |                                 | Zero filled   |
|                    |            |                                 | Unsigned  |
| 31-62              | 32         | Title of account to be debited/ | BECS EBCDIC character set valid   |
|                    |            | credited                        | Must not contain all blanks   |
|                    |            |                                 | Left justified  |
|                    |            |                                 | Leave blank   |
|                    |            |                                 | Desirable format:   |
|                    |            |                                 | Surname followed by blank   |
|                    |            |                                 | Given names with a space between each name  |

| Character Position | Field Size   | Field Description   | User Specification   |
|--------------------|--|---|--|
| 63-80              | 18   | Lodgement Reference   | BECS EBCDIC character set valid  |
|                    |  | (Reference as submitted by  | Left justified   |
|                    |  | the User, indicating details of<br>the origin of the entry, e.g.<br>Payroll Number, Invoice,<br>Unique Customer Identifier).<br>NOTE: This field is used by financial<br>institutions for statement narrative | Leave blank  |
| 81-87              | 7  | BSB Number in format xxx-xxx  | Must be numeric with a hyphen in character position 84   |
|                    |  | *Trace: to enable retracing of<br>the entry to its source if<br>necessary.  | Character positions 81-83 must be a valid 2 or 3 digit<br>Institution identifier issued by AusPayNet   |
|                    |  |   | (refer to AusPayNet website "BSB Numbers in Australia")  |
| 88-96              | 9  | Account Number  | Alpha-Numeric (26 letters of the alphabet)   |
|                    | *Trace: to enable retracing of<br>the entry to its source if<br>necessary. | *Trace: to enable retracing of  | Hyphens & blanks only are valid  |
|                    |  | Must not contain all blanks or all zeros  |  |
|                    |  | necessary.  | Leading zeros, which are part of an account number, must be shown  |
|                    |  |   | Edit out hyphens where account number exceeds nine characters  |
|                    |  |   | Right justified  |
|                    |  |   | Leave blank  |
| 97-112             | 16   | Name of Remitter (Name of   | BECS EBCDIC character set valid.   |
|                    |  | originator of the entry. This may vary from Name of User.)  | Must not contain all blanks  |
|                    |  | may vary nom wame or oser.,   | Left justified   |
|                    |  |   | Leave blank  |
|                    |  |   | <b>NOTE:</b> This field is used by financial institutions for statement narrative. When a Detail Record is used for a financial institution drawing under a Transaction Negotiation Authority, this field must contain the name of the Lodgement financial institution |
| 113-120            | 8  | Amount of withholding tax   | Numeric only   |
|                    |  |   | Show in cents without punctuation  |
|                    |  |   | Right justified  |
|                    |  |   | Zero filled  |
|                    |  |   | Unsigned   |

<sup>\*</sup>Trace - A Trace Account is used by the beneficiary bank to return the funds to the remitter in the event that they cannot be applied to the beneficiary's account. The trace account must be the User's own account or an account which the User has authority to operate and/or use as a Trace Record. In many cases, the Trace Record is also used to satisfy the requirements of the Anti-Money Laundering and Counter-Terrorism Financing Act 2006 (Cth) concerning the inclusion of Tracing Information in electronic funds transfer instructions. Please refer to Part 5 of the Act for details.

Note: For a self-balanced file, the very last line of this section is required to be a balancing entry for a self-balanced direct entry file.

### 2.1.2 Record Type '7' - File Total Record

| Character Position | Field Size                  | Field Description            | User Specification  |
|--------------------|-----------------------------|------------------------------|---|
| 1                  | 1                           | Record Type 7                | Must be '7'   |
| 2-8                | 7                           | BSB Number in format xxx-xxx | Must be numeric with a hyphen in character position 5   |
|                    |                             |                              | Character positions 2 to 4 must be a valid 2 or 3 digit institution identifier issued by APCA (refer to AusPayNet website "BSB Numbers in Australia") |
| 9-20               | 12                          | Blank                        | Must be left blank  |
| 21-30              | 10                          | File (User) Net Total Amount | Numeric only  |
|                    |                             |                              | Show in cents without punctuation   |
|                    |                             |                              | Right justified   |

#### 2.1.3 Coded Character Set

Only the BECS EBCDIC Character Bit Structure is valid, this includes the following most commonly used characters:

- Numeric 0 to 9
- Alphabetic Uppercase A to Z and Lowercase a to z
- Special characters

#### **Special Characters**

| Symbol | Meaning              | Symbol | Meaning                            |
|--------|----------------------|--------|------------------------------------|
| +      | Addition (plus) sign | -      | Subtraction (minus) sign or hyphen |
| @      | At sign              | :      | Colon                              |
| SP     | Space                | ;      | Semicolon                          |
| !      | Exclamation mark     | =      | Equal sign                         |
| ٨      | Circumflex           | ?      | Question mark                      |
| \$     | Dollar sign          |        | Period or decimal point            |
| %      | Percentage sign      | #      | Number sign (pound or hash)        |
| &      | Ampersand            | _      | Low line (underscore)              |
| •      | Apostrophe           | ,      | Comma                              |
| (      | Left parenthesis     | [      | Left square bracket                |
| )      | Right parenthesis    | ]      | Right square bracket               |
| *      | Asterisk             | /      | Solidus (right slash)              |

Unprintable characters will be replaced with a period ('.')

#### 2.1.4 Transaction Codes

| Transaction type<br>(Debit/Credit) | Transaction Description   |  |
|------------------------------------|---|--|
| Debit                              | Debit Items   |  |
| Credit                             | Credit Items  |  |
| Credit                             | Australian Government Security Interest   |  |
| Credit                             | Basic Family Payments/Additional Family Payment   |  |
| Credit                             | Pay   |  |
| Credit                             | Pension   |  |
| Credit                             | Allotment   |  |
| Credit                             | Dividend  |  |
| Credit                             | Debenture/Note of Interest  |  |

# 3. Validations

#### 3.1 General Validation Controls

The Payment Validation process contains the following validation controls:

- Record length is 120 characters
- Checks that the record is terminated with CRLF (Carriage Return/Line Feed)
- Checks that the first character of a record is a valid record type (i.e. 0, 1, or 7)
- Checks that the records are in sequence (i.e. 0, 1, 7)
- Checks that a file has either multiple debit records with one credit record or multiple credit records with one debit record. Multiple debit and credit records are not allowed within a single file
- Checks that the file complies with the BECS character set. Characters outside the BECS character set will be replaced with a period ('.')
- · Checks that the trace account number for the payment is configured for the customer
- Checks that the customer has a debit or credit account configured to match the balancing record for the payment
- Maximum line items (25,000 lines)

NAB will create compensating transactions for payments where an invalid BSB and/or account is found within a file being validated. This is to ensure rejected payments do not cause rejection of other payments within a Direct Entry file. Compensating transaction information will be found in the resulting disbursement report provided by NAB available for each file.

If any matches are found, the payment is held and must be approved/declined by NAB support.

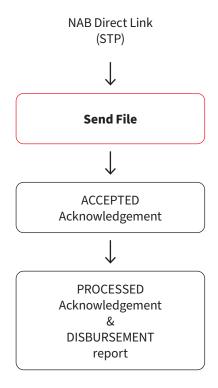

- Direct entry payments sent using STP are held at NAB Support
- Direct entry payments sent via NAB Direct Link and requiring NAB Connect authorisation will notify the NAB Connect Authoriser that the payment is a potential duplicate, requiring action.

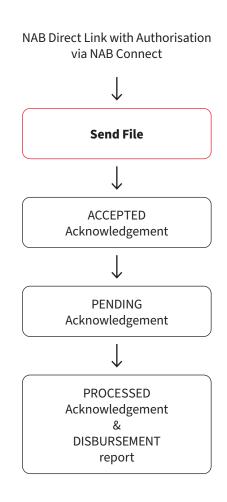

# 4. Acknowledgement Files

Each submitted payment file will undergo validation before being processed and Acknowledgement files are generated to provide status updates.

The name of these files is: <original payment filename>.<status>.ACK

Along the payment journey, certain Acknowledgements may be generated more than once.

#### 4.1 Format

| Element   | Description   |  |  |
|---|---|--|--|
| <paymentsacknowledgement></paymentsacknowledgement>   | Contains information about the originating customer   |  |  |
|   | See "payment statuses" for definitions of possible "type" attributes                        |  |  |
| <paymentid></paymentid>   | Contains the message number of the payment instruction                                      |  |  |
| <originalmessageid></originalmessageid>   | Contains the message number of the original file  |  |  |
| <datetime> Contains the date &amp; time the Acknowledgement was generated in the forma</datetime> |   |  |  |
| <customerid></customerid>   | Contains the NAB Direct Link Mailbox ID   |  |  |
| <companyname> Contains the registered NAB Direct Link customer name</companyname>                 |   |  |  |
| <usermessage> Short description of the current status of the file</usermessage>                   |   |  |  |
| <detailedmessage></detailedmessage>   | Long description of the current status of the file  |  |  |
| <originalfilename></originalfilename>   | Contains the original file name   |  |  |
| <lssues></lssues>   | Contains the total history of the payment processing  |  |  |
| <lssue></lssue>   | Contains a payment processing event.  |  |  |
|   | Has a "type" attribute that classifies the event type as generated by the processing system |  |  |

## 4.2 Acknowledgement Status

- The status will be populated into the filename of the Acknowledgement provided
- For example, if an original payment file was submitted for processing labelled "TestPayment.aba", the resulting processed Acknowledgement will be labelled "TestPayment.aba.asc.PROCESSED.ACK"
- .asc is populated into the filename as this indicates the file is PGP encrypted by NAB

There are 3 payment Acknowledgement types:

| Acknowledgement Type   | Reason   |  |  |
|--|--|--|--|
| info Standard Acknowledgement  |  |  |  |
| warn   | File has not processed, and requires intervention            |  |  |
|  | Generally, this is when a payment is required to be approved |  |  |
| error File has not been processed, review payment file, resolve and resubmit |  |  |  |

There are 5 possible Acknowledgement statuses returned by NAB Direct Link. The <UserMessage> field indicates the specific status of the payment file.

| Status    | Туре  | Filename extension | Description  |
|-----------|-------|--------------------|--|
| Accepted  | Info  | ACCEPTED.ACK       | Information about the status of the payment          |
| Processed | Info  | PROCESSED.ACK      | Confirmation of successful processing of the payment |
| Rejected  | Error | REJECTED.ACK       | Notification of failure to process the payment       |
| Pending   | Warn  | PENDING.ACK        | Payment has been held and requires intervention      |
| Declined  | Info  | DECLINED.ACK       | Notification of payment being declined               |

# 4.3 Examples of common messages

| Acknowledgement Type | User Message  | Detailed Message  | Filename Extension |
|----------------------|---|---|--------------------|
| info                 | Payment status is<br>FUTURE DATED                           | Payment has been successfully validated and will be processed on the value date                           | ACCEPTED.ACK       |
| warn                 | Payment 9999999 has<br>been held                            | Payment 9999999 has completed validation and has been held due to the following issues                    | PENDING.ACK        |
| warn                 | Payment status is<br>REQUIRES APPROVAL                      | Payment has breached customer controlled limit and requires customer approval                             | PENDING.ACK        |
| warn                 | Payment status is<br>REQUIRES<br>AUTHORISATION              | Payment requires customer authorisation.<br>Log into NAB Connect to review and<br>authorise payment       | PENDING.ACK        |
| warn                 | Payment status is<br>REQUIRES BANK<br>APPROVAL              | Payment has exceeded the bank controlled limit and requires approval                                      | PENDING.ACK        |
| info                 | Payment status is PROCESSED                                 | Payment has been successfully processed   | PROCESSED.ACK      |
| info                 | Payment status is<br>PROCESSED WITH<br>INVALID TRANSACTIONS | Payment has been successfully processed and invalid item have been returned to customer's account         | PROCESSED.ACK      |
| error                | Payment 99999999 has<br>been rejected                       | Payment 99999999 has completed validation and has been automatically rejected due to the following issues | REJECTED.ACK       |
| error                | Payment status is<br>DELETED                                | Payment has been deleted and has not been processed   | REJECTED.ACK       |
| error                | Payment status is<br>CANCELLED                              | Payment has been cancelled by the system and has not been processed                                       | REJECTED.ACK       |
| error                | Payment status is<br>REJECTED                               | Payment has been rejected and has not been processed  | REJECTED.ACK       |

# 5. Disbursement Reports

#### **Overview**

This report assists with confirming the processing of your payment file and identify failed/compensated direct entry payments for reconciliation purposes.

Information provided:

- · Transaction summary for disbursed items
- Transaction details for disbursed items
- Failed items summary and details

A disbursement report is generated for each file submitted for processing with the following filenames:

| Format    | Actual file naming convention                          |  |
|-----------|--|--|
| CSV       | <original filename="">.DISBURSEMENT.RPT</original>     |  |
| Formatted | <original filename="">.DISBURSEMENT.RPT.TXT</original> |  |

# 5.1 File Layout

#### Header

| Format              | Description                                       |
|---------------------|---|
| Record              | 00  |
| Bank Name           | "NATIONAL AUSTRALIA BANK"                         |
| Product Name        | "Direct Link"                                     |
| Report Name         | "Direct Link – Direct Credit Disbursement Report" |
|                     | or  |
|                     | "Direct Link – Direct Debit Disbursement Report"  |
| Run Date            | [date of report generation DDMMYYYY]              |
| Run Time            | [time of report generation HHMMSS]                |
| Fund ID             | [Mailbox ID]                                      |
| Customer Name       | [DE user name]                                    |
| Import File Name    | [original file name from CPH envelope]            |
| Payment Date        | [value date]                                      |
| Batch No Links      | [Payment ID]                                      |
| Export File Name/s  | [NAB Connect "file name" field]                   |
| DE User ID          | [DE user ID]                                      |
| MEID                | Not used  |
| File Name of Report | [filename of report]                              |
|                     |   |

#### **Credit Payment**

| Field             | Data source    |
|-------------------|----------------|
| Record            | 53             |
| Payment Type: DNN | "DNN"          |
| Lodgement Ref     | [Reference]    |
| Amount            | [Amount]       |
| Currency          | [Currency]     |
| Credit/Debit      | "CR"           |
| Title of Account  | [Account Name] |
| BSB Number        | [BSB]          |
| Account No        | [Account No]   |

#### Value Summary 1

| Field               | Data source                    |
|---------------------|--------------------------------|
| Record              | 54                             |
| Sub-trancode UVD    | "UVD"                          |
| Number of items DEC | [total number of credit items] |
| Total of items DEC  | [total value of credit items]  |

#### **Debit Payment**

| Field             | Data source    |
|-------------------|----------------|
| Record            | 57             |
| Payment Type: DNN | "DNN"          |
| Lodgement Ref     | [Reference]    |
| Amount            | [Amount]       |
| Currency          | [Currency]     |
| Credit/Debit      | "DR"           |
| Title of Account  | [Account Name] |
| BSB Number        | [BSB]          |
| Account No        | [Account No]   |

#### Value Summary 2

| Field               | Data source                   |
|---------------------|-------------------------------|
| Record              | 58                            |
| Sub-trancode UVD    | "UVD"                         |
| Number of items DED | [total number of debit items] |
| Total of items DED  | [total value of debit items]  |

#### **Failed Items**

| Field                | Data Source                   |

# 6. Direct Entry Returns Report (Dishonour)

The Direct Entry (DE) Returns report is used to communicate details of the electronic return of credit or debit items transactions.

There are 2 different report types that may be configured. For either report type the actual file format remains the same.

The file format is a fixed record length and uses lines of information 120 characters in length.

| Report Type      | File Name convention                                       | Notes  |  |  |
|------------------|--|--|--|--|
| By DE User ID    | DTRET01_123456_YYYYMMDD_nnnnnnnn.1.txt                     | Contains Direct Entry return information for<br>previous business day based on the Direct  |  |  |
|                  | Where:   | Entry User ID (DEID) that the original Payment file was processed under.   |  |  |
|                  | 123456 = Direct Entry User ID                              | •  |  |  |
|                  | Y=Year   | • Limited to reporting on only one DEID per  |  |  |
|                  | M=Month  | report file  |  |  |
|                  | D=Day  |  |  |  |
|                  | nnnnnnnn = internal NAB reference number (unique per file) |  |  |  |
| By Trace Account | DTRET02_YYYYMMDD_null.txt                                  | <ul> <li>Contains Direct Entry return information<br/>for previous business day based on trace<br/>account(s) configured to NAB Direct</li> </ul>            |  |  |
|                  | Where:   | Link Mailbox.  |  |  |
|                  | Y=Year   |  |  |  |
|                  | M=Month  | Will report Direct Entry return information  |  |  |
|                  | D=Day  | based upon trace account(s) regardless of the DEID used in original Payment file, provided trace account(s) were specified as part of original payment file. |  |  |
|                  |  | This report type may contain both Debit and<br>Credit transaction information.   |  |  |

### **6.1 DE Returns Report format**

#### 6.1.1 File Structure

The DE Returns file consists of a single header record, followed by multiple detail records, then a single file trailer record. Each record is terminated with a Carriage Return (0x0D) and Line Feed (0x0A).

All records are fixed width and padded as detailed in the following sections.

| Record  | Remarks                   | Description          | Length |
|---------|---------------------------|----------------------|--------|
| HEADER  | File Header               | One per File         | 120    |
| DETAIL  | Transaction Detail Record | One or more per file | 120    |
| TRAILER | File Trailer              | One per file         | 120    |

#### 6.1.2 File Layout: Record Type 0 - Descriptive Record (Header)

| -             | •            | · · ·   |   |
|---------------|--------------|---|---|
| Starting Byte | Field Length | Field Description   | Source / Value  |
| 1             | 1            | Record Id   | Must be '0'   |
| 2             | 17           | Not used  | Spaces  |
| 19            | 2            | Reel Sequence Number  | '01'  |
| 21            | 3            | Mnemonic of financial institution initiating return e.g. NAB                            | Must be an AusPayNet approved three character mnemonic.   |
| 24            | 7            | Not used  | Spaces  |
| 31            | 26           | Mnemonic of the sending<br>member<br>e.g. NAB   | The three character mnemonic of the sending member only, not its full name. Must be an AusPayNet approved financial institution abbreviation. |
|               |              |   | Left justified, leave blank.  |
| 57            | 6            | Direct Entry User id.   | Must be numeric.  |
| 63            | 12           | Description of entries on file (e.g. DE Returns)  | Description of file.<br>Spaces if description not<br>available.   |
| 75            | 6            | Date of return (the date transactions are returned to initiating financial institution) | DDMMYY format   |
| 81            | 40           | Not used  | Spaces  |
|               |              |   |   |

### 6.1.3 File Layout: Record Type 2 - Detail Record

| Starting<br>Byte | Field<br>Length | Field Description                      | Source / Value   |
|------------------|-----------------|--|--|
| 1                | 1               | Record Id                              | Must be '2'  |
| 2                | 7               | BSB Code (including hyphen "-")        | Positions 81-87 of the original type 1 (credit/debit) record (Trace BSB).  |
| 9                | 9               | Credit/Debit Account Number            | Positions 88-96 of the original Type 1 Detail Record (Trace Acc).  |
| 18               | 1               | Return Code                            | Valid industry return code. Numeric.   |
|                  |                 |  | One of: 1 Invalid BSB number 2 Payment stopped 3 Account closed 4 Customer deceased 5 No account or incorrect account number 6 Refer to customer 7 [deleted – not used] 8 Invalid User ID Number 9 Technically invalid |
| 19               | 2               | Transaction Code                       | Position 19 – 20 of the original type 1 record.  |
| 21               | 10              | Amount                                 | Positions 21 – 30 of the original type 1 record.   |
| 31               | 32              | Account Name                           | Positions 31 – 62 of the original type 1 record.  NOTE: BECS EBCDIC character set valid <i>however</i> other financial institutions may return this information in UPPER CASE.   |
| 63               | 18              | Lodgement Reference                    | Positions 63 – 80 of the original type 1 record.  NOTE: BECS EBCDIC character set valid <i>however</i> other financial institutions may return this information in UPPER CASE.   |
| 81               | 7               | Trace BSB Code including hyphen        | Positions 2 – 8 of the original type 1 record.   |
| 88               | 9               | Trace Account Number                   | Positions 9 – 17 of the original type 1 record.  |
|                  |                 |  | NOTE: Where account number less than 9 digits this will be displayed as right justified and will be 0 (zero) filled  |
| 97               | 16              | Remitter Name                          | Positions 97 – 112 of the original type 1 record.  |
|                  |                 |  | NOTE: BECS EBCDIC character set valid <i>however</i> other financial institutions may return this information in UPPER CASE.   |
| 113              | 2               | Original day of processing (dd format) | Positions 75 – 76 of the original type 0 record.   |
| 115              | 6               | Original User's ID Number              | Positions 57 – 62 of the original type 0 record.   |

#### 6.1.4 File Layout: Record Type 7 - File Total Record (Trailer)

| Starting<br>Byte | Field<br>Length | Field Description        | Source / Value  |
|------------------|-----------------|--------------------------|---|
| 1                | 1               | Record Id                | Must be '7'   |
| 2                | 7               | BSB Code                 | '999-999'   |
| 9                | 12              | Not used                 | Spaces  |
| 21               | 10              | Total File Net Amount    | Calculated as (File Credit Amount – File Debit Amount). Right justified, zero filled, in cents.                               |
|                  |                 |                          | Value is unsigned.<br>i.e absolute value of (credits – debits)  |
| 31               | 10              | Total File Credit Amount | Calculated as total credit amount of transaction types '50 – 99' in record id '2'; right justified and zero filled, in cents. |
| 41               | 10              | Total File Debit Amount  | Calculated as total debit amount of transaction type '00 – 49' in record id '2'; right justified and zero filled, in cents.   |
| 51               | 24              | Not used                 | Spaces  |
| 75               | 6               | Total Record Count       | Total number of records of type '2'. Right justified, zero filled.  |
| 81               | 40              | Not used                 | Spaces  |

#### Reconciliation against original Direct Entry payment file

- Some strings of characters within Detail record line(s) represent specific pieces of information which sometimes refer to your original Direct Entry payment file. For example, the characters at positions 21 30 refer to positions 21 30 of the original Type 1 record (the amount paid to or received from your customer).
- In some of these fields other financial institutions may return information in UPPER CASE which may not match the case of the field within your original Direct Entry payment file. For example, in a Detail record the Account Name at positions 31 62, the Lodgement Reference at positions 63 80 and the Remitter details at positions 97 112.

#### **Account length**

The beneficiary/payee account number will be reported as a 9-digit account number in any transaction records within this report. Where a beneficiary/payee account number is less than 9 digits in the original Direct Entry Payment file, this information will be displayed as right justified, 0 (zero) filled within the Direct Entry Returns Report (Record Type 2 - Detail Record position 88-96).
